	Examiner Edward J. Cain	Art Unit 1714	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

Claims 3, 4, 13 and 14 recite the limitation "the metal oxide" in line 1. There is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-25 and 29-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over FR '030 translation.

FR '030 translation discloses compositions and processes for producing laser markable tape. The compositions taught as suitable include PTFE, PPS and titanium oxide. The reference fails to explicitly recite particle sizes for the PPS or titanium dioxide.

It is the position of the examiner, however, that particle sizes such as claimed instantly would have been obvious to one of ordinary skill in the art desiring to produce a tape with thicknesses as taught by the reference when a smooth surface was desired.

The processes taught by the reference include "lubricated extrusion" which is seen by the examiner as equivalent to applicant's paste extrusion.

Claims 26-28 and 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1, 2, 5-12, 15-20 and 33-44 are allowed.
